SPEAKER: CLAYTON DILLAVOU, CHAIR OF KIRKSVILLE WATERSHED MANAGEMENT COMMISSION

Clayton retired as a medical microbiologist nine years ago and has chaired this commission since November, 2005.

The commission's mission is to evaluate conditions in the watershed and reservoirs and make recommendations to the City Council concerning the goals and implementation of the approved Source Water Protection and Watershed Management Plans for both Hazel Creek and Forest lakes. The Commission has nine voting members and 11 non-voting members, including federal, state, county and city officials. He said overall conditions here are good, although there were some E. coli problems during heavy rains recently. Sedimentation from shoreline erosion and nutrient loading are among potential concerns. (The speaker is pictured in left photo above with Harriet Beard who introduced him.)
